PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in developing and deploying client-facing web applications using PHP, MySQL, HTML5, CSS3, and JavaScript. Experienced in database-driven application development, user authentication, role-based access control, file and image uploads, administrative dashboards, and web deployment. Successfully delivered a production web application to a client, including source code and deployment configuration. Familiar with Git, GitHub, domain management, hosting, and basic SEO. Seeking a Junior PHP, Laravel, Backend, or Web Developer position where I can contribute to real-world projects and continue developing my software engineering skills.

TECHNICAL SKILLS

Web Development: PHP, HTML5, CSS3, JavaScript
Database: MySQL, Database Design, SQL
Development Tools: Git, GitHub, Visual Studio Code
Web Deployment & Administration: Hostinger, cPanel, Domain Management, Website Deployment, Basic SEO
Additional IT Skills: Network Configuration, IP Camera Installation and Programming, CCTV Systems
Business & ERP Systems: OnyxPro ERP System, Financial Accounting

PROJECT EXPERIENCE

Freelance Web Developer — Client Project

MawahibSoft | https://mawahibsoft.com

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript, Git, GitHub, Hostinger

- Designed and developed a production web application based on the client's requirements using PHP and MySQL.
- Implemented user authentication and login functionality.
- Developed an administrative dashboard for managing application data and users.
- Implemented user roles and permissions to control access to different system functions.
- Developed database-driven user management and search functionality.
- Implemented file and image upload functionality.
- Configured domain and hosting settings and deployed the application on Hostinger.
- Applied basic SEO practices to improve website indexing and search engine visibility.
- Used Git and GitHub for source-code version control and project management.
- Completed the final project handover to the client, including the source code and deployed application.
